SUMMARY

Detail-oriented Frontend Developer specializing in React.js, modern JavaScript, and responsive UI architecture. Experienced in translating complex designs into high-performance, interactive web applications. Successfully shipped 7+ **production-ready projects** with a strong focus on state management, seamless API integration, and user experience. Currently optimizing interactive data visualizations as a Summer Research Intern at IIT Ropar.

TECHNICAL SKILLS

Frontend & UI: React.js, Next.js, Redux/Context API, HTML5, CSS3, Tailwind CSS, Material UI

Languages: JavaScript (ES6+), TypeScript, Python, C++ , Java

Backend & APIs: Node.js, Express.js, RESTful API Integration, JWT Authentication, Firebase

Tools & Deployment: Git, GitHub, Chrome DevTools, Vercel, Netlify, Socket.IO client

WORK EXPERIENCE

Indian Institute of Technology (IIT) Ropar | *Summer Research Intern — UI & Data Visualization*

May 2026 – Present

Ropar, Punjab

Developing interactive frontend interfaces and visual dashboards to represent complex MATLAB-based domain adaptation metrics and machine learning results.

Assisting in intelligent data analysis by creating accessible, user-friendly data representations for ML experiments.

Ethara AI | *LLM Post-Training Intern*

Dec 2025 – Jan 2026

Remote

Built and refined evaluation workflows and user interfaces for analyzing Large Language Model responses.

Conducted prompt engineering and validated model outputs through structured, frontend-driven data collection forms.

PROJECTS

Inventory SaaS Dashboard | *React.js · Tailwind CSS · Context API · REST APIs*

[🔗 Live](#)

Spearheaded the frontend architecture of a React dashboard utilizing Context API for global state management, enabling real-time stock tracking and boosting user operational efficiency by **40%**.

Developed a scalable, reusable UI component library with Tailwind CSS and integrated an AI chatbot, securely consuming scalable RESTful APIs via Axios with custom JWT-based interceptors.

Implemented dynamic data visualization using Chart.js to display real-time stock analytics, transforming complex inventory datasets into actionable, interactive visual metrics for administrators.

AI Portfolio Generator | *React.js · CSS Modules · Groq AI API*

[🔗 Live](#)

Engineered a highly responsive, multi-theme UI utilizing CSS Modules that enables users to seamlessly generate comprehensive, personalized developer portfolios in **under 2 minutes**.

Optimized client-side performance by managing asynchronous Groq AI API calls; implemented skeleton loaders, React Suspense, and error boundaries to ensure a frictionless user experience.

Achieved a **98+ Lighthouse performance score** by leveraging code splitting, lazy loading of React components, and optimized asset delivery for lightning-fast initial page loads.

EventSphere — Interactive Booking UI | *React.js · Socket.IO Client · Razorpay*

[🔗 Live](#)

Built a high-performance, interactive seat-selection grid utilizing React Hooks and Socket.IO-client to render live, conflict-free seat availability updates for concurrent users.

Streamlined the entire user journey by implementing a frictionless checkout architecture with Razorpay integration and securing user onboarding via a smooth Google OAuth flow.

Engineered complex form validations utilizing React Hook Form and Zod, drastically reducing client-side submission errors and ensuring robust data integrity before triggering backend API calls.

TruthGuard — Fake News Analyzer | *React.js · Responsive Design · Python NLP Backend*

[🔗 Live](#)

Designed an intuitive, accessibility-focused React interface allowing users to input text and visualize real-time fake news credibility analysis alongside complex NLP metrics.

Orchestrated heavy asynchronous data fetching from a Python backend, optimizing DOM rendering with custom loading animations and informative toast notifications to handle API latency.

Integrated robust state persistence with local storage, allowing seamless toggling between dynamic dark and light themes using Tailwind CSS to enhance prolonged user reading comfort.

EDUCATION

Madhav Institute of Technology and Science (MITS) | *B.Tech — Internet of Things (IoT)*

Expected 2027

Gwalior, Madhya Pradesh

ACHIEVEMENTS

Finalist: Smart India Hackathon 2025

Team Leader & Frontend Lead: Hacksagon 2025

7th Rank: Code Coalescence Contest

UI Excellence: Built and shipped 7+ **production-ready interfaces** actively used by real users.
